

KUKANG COFFEE

THE STORY OF COFFEE, THAT PROTECTS NATURE

We are an organization operating in Indonesia, where we protect slow lorises and fight against the illegal trade in wild animals.

Your cup of coffee began its journey in the area of Tanah Karo on the edge of the rainforests of untamed Sumatra.

We get coffee directly from small farmers at a higher price and help them improve their living conditions.

Thanks to Kukang Coffee, this community of farmers now protects threatened species, including our slow lorises.

In our area, coffee is grown in a nature-friendly way without chemicals, and thanks to a well-thought-out method of processing, it is of very high quality.

Thanks to the story of this coffee, it was possible to end the hunting of slow lorises, pangolins and other threatened species in Tanah Karo.

Become a part of the conservation story of Kukang Coffee!

By every single cup of this coffee you help protect slow lorises, pangolins and other endangered animals in Sumatra. Enjoy it!

Selamat menikmati kopimu

Taste the Story!
